PALMETTO CARE CONNECTIONS™

technology. broadband. telehealth.

datasheet:
remote monitoring management

features at a glance

Managed Endpoint Detection and Response

- Keep your business, employees, and all your devices safe from cyberattacks with An antivirus solution that employs near-perfect malware protection.

Web Protection

- Safeguard users from visiting malicious websites that could harm your network and devices.

Remote Monitoring

- Easily monitor workstations, servers, network devices, and mobile from within a unified dashboard.

LOGICcards

- Leverage actionable data-driven insights to identify and prevent issues before they occur.

Active Discovery

- Identify new devices as they come onto the network and bring them under management with a single click.

Automation & Scripting

- Create scripts to automate routine tasks using a simple drag-and-drop interface–no need to learn a scripting language or write a line of code.

Backup & Recovery

- Back up files faster and, in the event of a disaster, restore full systems within minutes.

Mobile Device Management

- Monitor, maintain, and keep track of company and employee-owned mobile devices.

Reporting

- Reports you need to make better decisions and demonstrate the value of your work.

Remote Access

- Repair any workstation or server without leaving your desk.

Patch Management

- Keep all your software up-to-date in a highly automated fashion with auto approval of all critical and security updates.

Real-Time Architecture

- Benefit from a world-class, ultra responsive, near real-time monitoring platform for faster, more proactive service.

Cross-Platform Support

- Deliver the highest levels of service to your Windows®, Mac®, and Linux® users.

Risk Intelligence

- Identify sensitive, hard-to-find data and calculate the risk of a data breach in dollars.

100% Cloud/SaaS Model

- Deploy plug-and-play IT services in a highly flexible and cost-effective way.
