PRESENTED BY PALMETTO CARE CONNECTIONS

Telehealth Research & Reports

August 24 at 10:00am-11:00am EST

Understanding the evolving role of telehealth in our fast changing healthcare environment is critical for healthcare leaders and providers alike. The goal of our biannual Telehealth Research & Reports series is to keep the community abreast of telehealth research occurring here in South Carolina. In this August webinar, a panel of MUSC researchers will discuss three different telehealth research initiatives:

- Provider and health system leadership perspectives on telehealth ambulatory expansion during COVID
- Use of health care utilization heatmapping to inform telehealth strategy
- Telehealth and rural hospital finance

Join us to learn about these projects, hear preliminary findings, and discuss their implications for telehealth here in South Carolina.

Elizabeth Brown, PhD, MPA
Assistant Professor
College of Health Professions
Medical University of South Carolina

Ryan Kruis, MSW
Director of External
Affairs and Research
MUSC Center for Telehealth

Kit Simpson, DrPH
Professor
College of Health Professions
Medical University of South Carolina

Dunc Williams, PhD, MHA
Associate Professor
College of Health Professions
Medical University of South Carolina

PROGRAM OBJECTIVES:

- Describe key barriers and facilitators to telehealth expansion as identified by healthcare leaders and providers
- Identify novel use of heat mapping to inform telehealth strategy
- Understand the role of telehealth in rural hospital sustainability using a tele-emergency program as a use case
