Help Me Grow SC

As the Chair of the Board of Directors for Palmetto Care Connections (PCC), I am pleased and honored to share the 2022 Annual Report. I am proud to have supported and witnessed PCC's dedication to increase access to care through telehealth, technology, and broadband at the forefront of the covid-19 pandemic. PCC has promoted and provided telehealth support services to health care providers serving rural and underserved communities for twelve years.

In its vision to increase access to care through telehealth utilization, PCC soon recognized the significant role of broadband with the utilization of telehealth. In 2015, PCC became the Broadband Consortium Leader for South Carolina assisting hospitals, federally qualified health centers, skilled nursing facilities, rural health clinics, behavioral health clinics and other eligible

healthcare provide in saving millions of dollars on broadband expenses. PCC diligently worked to help healthcare providers become "telehealth ready" to connect with their patients. During the covid-19 pandemic, it was discovered that while most healthcare providers were "telehealth ready", their patients were not. PCC expanded its services to the patient community by connecting the unconnected with the launch of its digital inclusion program and creating telehealth access points in settings such as churches, senior centers, and affordable housing developments.

PCC continues to demonstrate its devotion to increase access to healthcare in rural and underserved areas through telehealth, technology, and broadband by convening with its partners and developing new relationships with community-based organizations to catalyze health equity in South Carolina. This Annual Report will reflect PCC's commitment to health equity and its trailblazer mindset to take innovative approaches to connect the provider to the patient and the patient to the provider.

letter from the chief executive officer

Kathy Schwarting, MHA
Palmetto Care Connections

What a busy and wonderful year this has been for Palmetto Care Connections (PCC) striving towards digital and health equity through the use of broadband, telehealth, and technology since COVID-19! On the journey to increase telehealth adoption in South Carolina, PCC has developed a focus on infrastructure, education, training, and digital skills.

*I am proud to share the impact of PCC's Broadband Consortium statewide and nationally. Since 2013, PCC has saved healthcare providers in South Carolina more than **\$42 million** in broadband costs. Nationwide, PCC has saved eligible healthcare providers more than **\$74 million** in broadband costs.*

*Telehealth education through webinars and the Annual Telehealth Summit continues to be a priority at PCC. We were finally back in person at our 10th Annual Telehealth Summit, and it was amazing! The Summit showcased a legislative panel, payer panel, and other diverse sessions that were supportive of telehealth and broadband to reach **250 registrants and 26 sponsors**. As co-chair of the South Carolina Telehealth Alliance (SCTA), PCC and SCTA collaborate to provide telehealth education and implementation support across the state. During Telehealth Awareness Week, together SCTA and PCC covered advocacy and outreach on all levels with legislators, state agencies, community-based organizations, clinicians, and patients.*

*During the covid-19 pandemic, telehealth adoption by healthcare providers grew at an exponential rate. A moment of feeling accomplished faded as we began to realize the needs of the patient for infrastructure, education, training, and digital skills to improve telehealth adoption. PCC seized the opportunity to close the gap by launching its digital inclusion program. Through our digital inclusion program, PCC has reached nearly **1,000 South Carolinians** in rural and underserved communities in **13 Counties** and counting! Each program participant received in person digital literacy training with a telehealth segment, a laptop or tablet, and assistance with affordable internet solutions. Through digital inclusion, PCC tapped into an even more aggressive grassroots level and actually touched the patient. We are truly honored to have worked with these amazing individuals over the last year. This would not have been possible without the support of our funding partners and community-based organizations.*

I am honored to share the hard work of our PCC staff and partners that was accomplished in 2022. We look forward to working with partners, community leaders, and our Board of Directors in 2023 to continue to address telehealth, and healthcare access in our rural and underserved populations.

Pictured L to R: Matt Hiatt, MSITM, PMP, Chief Technology Officer, Palmetto Care Connections, Jeri Andrews, MSN, APRN, FNP-BC, Associate Medical Director, CareSouth Carolina, Inc. and Kathy Schwarting, MHA, Chief Executive Officer, Palmetto Care Connections

PCC has worked and will continue to work diligently to ensure our patients and healthcare facilities have access for telehealth and other healthcare needs. What an amazing difference Palmetto Care Connections makes across not only the CareSouth Carolina service area, but the entire state of South Carolina."

- Ann Lewis, CEO
CareSouth Carolina, Inc.

2022 Partnership Award

CareSouth Carolina presented Palmetto Care Connections with its Partnership Award. Palmetto Care Connections provides broadband and telehealth support services to CareSouth Carolina, Inc.

\$7.2 Million

Connected Care Pilot Grant

The Federal Communications Commission (FCC) Connected Care Pilot Program awarded \$7,199,892 to the broadband consortium of South Carolina, formerly known as the Palmetto State Providers Network (PSPN) led by Palmetto Care Connections. The funding will enable five federally qualified health centers and one hospital system to provide broadband internet access services, remote patient monitoring, and video consults to 5,000 primarily low-income South Carolinians suffering from chronic conditions and infectious diseases. In addition, the funding will provide health care provider broadband data connections, a connected care telehealth platform and data analytics to facilitate synchronous telehealth services for an estimated 18,000 patients in 13 counties.

- **57,125 qualifying patients will gain access to internet services to better control their healthcare outcomes**
- **Consortium members serve a predominantly rural and underserved population that includes veterans and low income households**
- **Some of the providers in this program exceed 95% of their patient volumes living below the 135% poverty level**

Tandem Health

Hospital System

Tidelands Health

The counties that are in the health care organizations' service areas to be impacted by the pilot program are Aiken, Chesterfield, Darlington, Dillon, Fairfield, Georgetown, Horry, Lee, Lexington, Marlboro, Newberry, Richland, and Sumter.

The last few years have made it abundantly clear that expanding telehealth programs to every corner of our state is of the utmost importance in advancing our public health missions. This funding will have an immediate impact on expanding access, quality, and affordability of health care statewide and will help bring us closer to providing immediate health care access to the fingertips of all South Carolinians."

-SC Governor
Henry McMaster

IMPACT

at a glance

\$1.3 Million Digital Literacy Funding

PCC has been able to provide digital literacy trainings, educate the community about affordable internet solutions, distribute digital devices, and offer tech support to South Carolinians with funding provided by multiple organizations.

248 Hours Digital Literacy Training

PCC has partnered with schools, churches, libraries, and senior centers as training sites to increase digital literacy in South Carolina, and provided more than 200 hours of in person training.

896 Digital Literacy Graduates

Through various partnerships with community based organizations, PCC has trained 896 South Carolinians.

This was my first experience! I loved it. I truly feel every subject discussed was important. The setting, temperature, entertainment, and vendors were all just perfect.

SCTA

SUPPORT STRATEGIES

The South Carolina Telehealth Alliance [SCTA] is a statewide collaboration of many organizations joining forces to expand telehealth services across the state. The SCTA Advisory Council is co-chaired by James McElligott, MD, MSCR, of the Medical University of South Carolina and Kathy Schwarting, MHA, of Palmetto Care Connections.

1 Service Extension

Objective: All citizens of South Carolina will have equitable access to ambulatory care. Telehealth modalities will be used in the ambulatory setting to extend the reach of services that would otherwise be limited by travel and related barriers to care.

4 Support Primary Care

Objective: All primary care clinics in the state, with emphasis on Health Professional Shortage Areas (HPSAs), will have access to integrated services through telehealth partnerships. These services are intended to support the mission of the primary care clinic as a medical home, emphasizing the importance of local health care infrastructure while mitigating gaps in access to supporting resources.

Support

Objective: hospital access to that enhance finances. These H represent extend hospitals with a focus resource urban ho commun through state.

Port Hospitals

Objective: Every community in our state will have telehealth partnerships to enhance its services and its

Hospital Services
Partnerships that care between using telehealth focus of connecting from larger hospitals to community hospitals out the

Convenient Care

Objective: All citizens in South Carolina will have affordable and immediately available patient-initiated virtual urgent and other health system-entry level care from an in-state provider. *Convenient Care* services are designed to engage individual patients through their own available devices in order to optimize utilization and maximize healthcare engagement.

Healthy Equity

Objective: Targeted, novel initiatives will close the gap in access to health care services for high-priority health disparities.

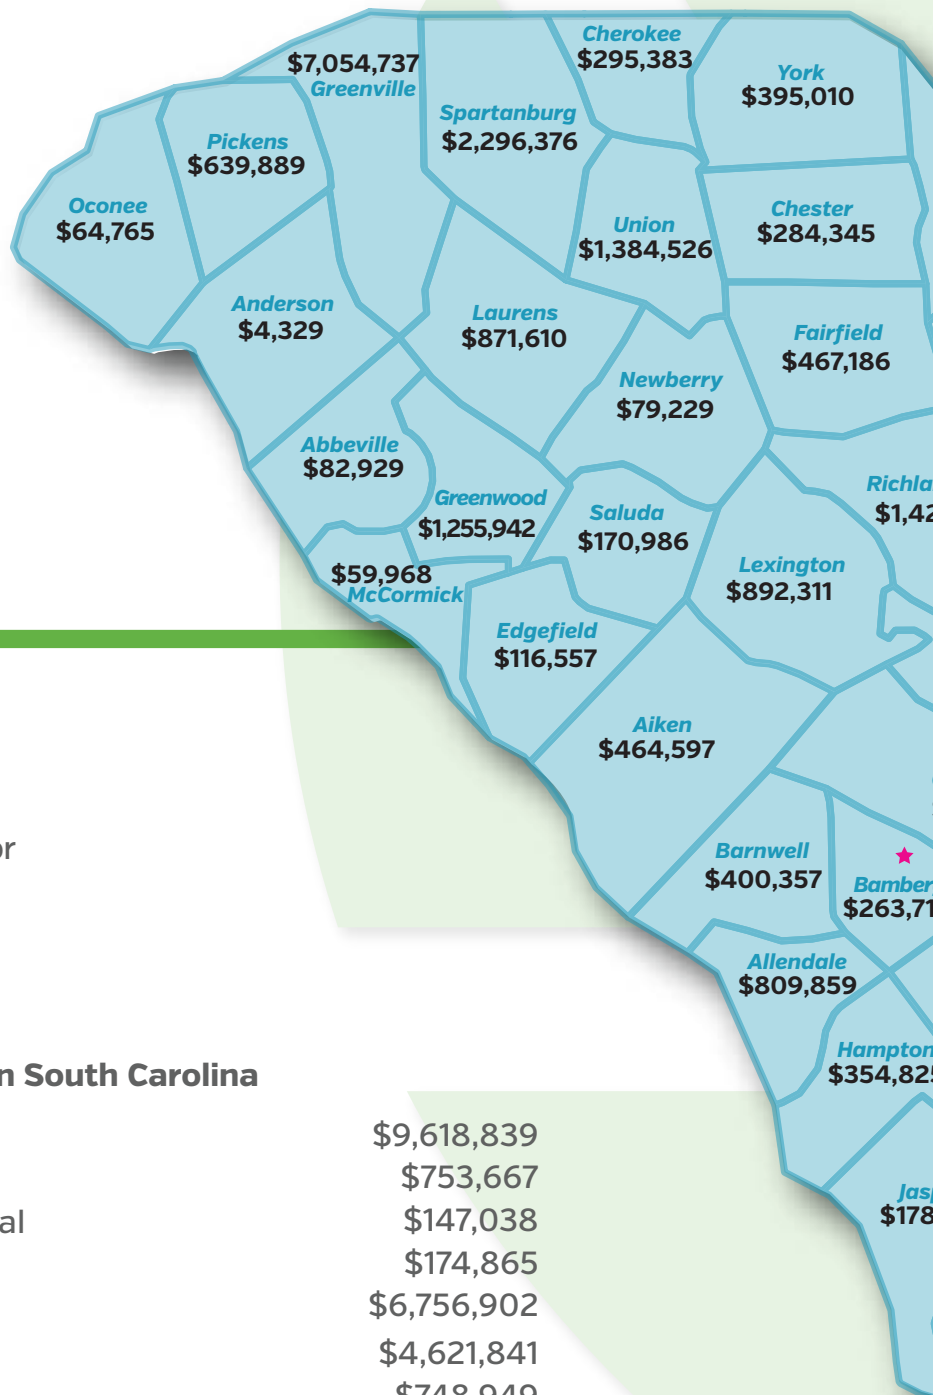

Health Equity services will progress towards achieving health equity across the state in specifically identified areas of health disparity.

Palmetto Care Connections is an essential partner within the South Carolina Telehealth Alliance, through their expansive efforts in broadband and connectivity access, telehealth education, and more recently, their incredible work with digital literacy trainings in rural areas of our state. Kathy and her team understand and respond directly to the challenges in health care access in SC's rural communities, and tirelessly advocate for and represent the rural needs of our state within the SC Telehealth Alliance.

- What Our Clients say -

I wish more organizations we worked with had such a service covering their security.

Auditor
Fairfield
Behavioral Health

Contracting with PCC (Matt) for our IT services continues to be an excellent choice for our organization. Matt is great to work with. Always professional, responsive and forward-thinking about our IT needs.

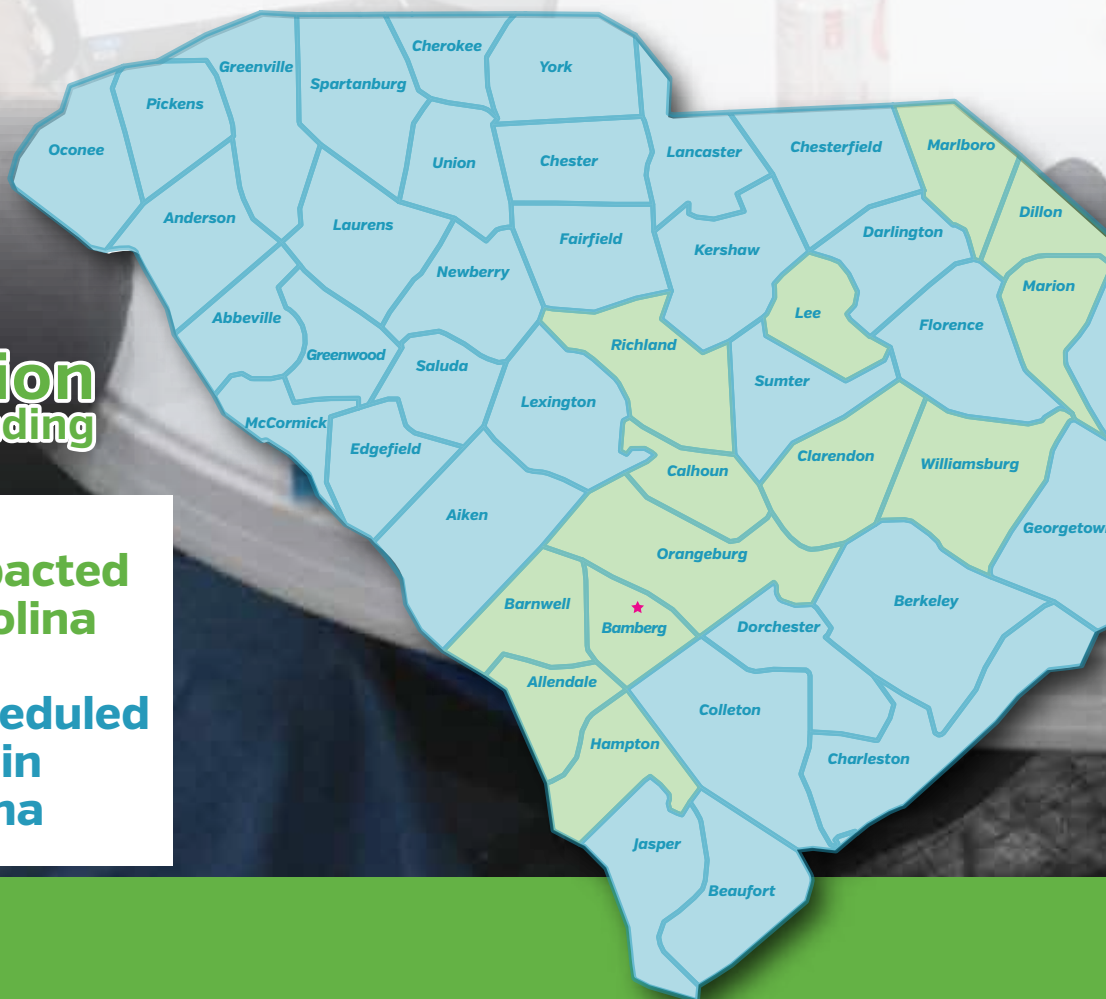

The ALPHA Center

PCC has been a great choice for our nonprofit agency to have access to top notch Managed IT Services while staying within our budget. Trustworthy expertise and prompt response to problems makes PCC second to none.

Fairfield Behavioral Health

According to the South Carolina Broadband Office, 137,000 households statewide remain without the standard internet service recommended by the Federal Communications Commission. Since 2021, Palmetto Care Connections has been on a mission to help close the digital divide in South Carolina by providing digital literacy trainings, affordable internet solutions, digital devices, online resources, and technical support through various funding opportunities.

testimonials

"My mother has cancer and must ride transportation to her doctor in Orangeburg. I now have a device that I can help her connect with her providers. This will keep her from being exposed to illnesses while her immune system is weak. I am very appreciative to PCC for the tools."

Hattie White
Bamberg County 2022

"I love this class – being around positive people and getting to know new things. I have high blood pressure and diabetes, so I want to use this computer to keep up with my doctors' appointments."

Rosa Abney
Barnwell County 2022

"I was diagnosed 5 years ago as a diabetic and have been wanting to connect with Donna Avant for Diabetes Education, but did not have a device to connect to her. I am so excited to connect to her so that I can improve my health."

Dorothy Lingard
Allendale County 2022

impact stories

Digital skills are essential for students today to complete homework assignments, communicate with instructors, take tests, and more. Marion County Adult Education (MCAE) assists individuals with attaining their GED (General Educational Development) high school diploma completion, and job training. The collaboration between MCAE and Palmetto Care Connections (PCC) was the perfect solution to a problem presented to Candyce Brooks, Director of Marion County Adult Education.

As a part of its community outreach, Marion County Adult Education partnered with Palmetto Care Connections to host a digital literacy training for Licensed Practical Nursing (LPN) students between the ages of 20 to 48 years old attending the Marion County School of Practical Nursing. PCC created a workforce development curriculum to teach fundamental computer skills to support the students with their educational goals.

The success of this LPN training led to two additional digital literacy trainings at MCAE because of “word of mouth”. While the first training was focused on workforce development, the others centered around the general needs of beginners to thrive in a technology-based era.

Candyce Brooks

Director of Marion County
Adult Education

“PCC's Digital Literacy Training aligns directly with Marion County Adult Education Services' purpose and mission of lifelong learning. It is the perfect partnership of community outreach to not only impact individuals, but their families as well. 90 individuals have participated in the trainings hosted at our center, but even more have been impacted to have access to a device, internet, and knowledge of services provided by Marion County Adult Education Services.”

-Candyce Brooks
Director of Marion County Adult Education

Access to computers and the internet is an integral part of a student's life. As a single mother, having a laptop at home would be more convenient.

Tracey learned about Palmetto Care Connections' Digital Literacy Training at a Telehealth Community Kick-off Event. She believed the training was an opportunity to learn more about telehealth, increase her digital skills, and enhance her home-school life balance with having a laptop at home.

Since the training, Tracey has enrolled in nursing school and is more confident in the quality of her assignments having a laptop at home to access school information at any time. Tracey has also enrolled in the Affordable Connectivity Program, one of the Federal Communications Commission's programs to help eligible households pay for internet service. By having internet and a laptop at home Tracey is one step closer to reaching her career goals to become a health care leader in the field of nursing.

telehealth awareness week

Palmetto Care Connections (PCC) celebrated Telehealth Awareness Week, September 18-24, 2022, by hosting several community-based events. PCC partnered with a church, a senior center, and an affordable housing development complex, to host Telehealth Tech Talk with the Doc in Allendale, Bamberg, and Orangeburg counties reaching more than 60 community members. Telehealth Tech Talk with the Doc created an opportunity for community members to see a mock telehealth demonstration, talk with a local health care provider about telehealth, and learn about digital inclusion resources solutions such as the Affordable Connectivity Program and PCC's Digital Literacy Training.

education

In collaboration with telehealth partners, Palmetto Care Connections hosts educational events for healthcare providers and patients. In 2022, PCC hosted its first in-person Summit since 2019. The 10th Annual Telehealth Summit of South Carolina brought together healthcare leaders across the state to Charleston to focus on the role of telehealth in digital and health equity. Guest speakers covered topics such as reimbursement, policy, best practices, and more. SC Representative Mark Smith, SC Representative Deon Tedder, and SC Representative Elizabeth “Spencer” Wetmore led a panel discussion about the Landscape of Telehealth and Broadband in South Carolina. The 2022 Telehealth Awards were presented by South Carolina Lieutenant Governor Pamela Evette. With the support of the planning committee, speakers, poster presenters, poster judges, and attendees, the 10th Annual Telehealth Summit of SC was a success!

Telehealth Support & Service

What is Palmetto Care Connections?

Palmetto Care Connections is a telehealth network that assists health care providers in connecting rural and underserved South Carolinians to quality services through broadband, technology and telehealth programs. Telehealth refers to a broad scope of remote health care services, including clinical care (called telemedicine) and non-clinical services such as provider training, consultations between providers and continuing medical education.
